PRODUCT OVERVIEW

Introducing the RKS-FHDI Rackmount KVM Switch Series

The **RKS-FHDI Rackmount KVM Switch Series** is designed to provide seamless management and control for up to 32 servers, with the ability to scale up to 1024 servers via 2-level cascading. Ideal for small server room to mid-sized datacenters environments, the switch series supports HD video resolutions up to 1920x1200@60Hz (Analog/VGA) and 1920x1080p@60Hz (Digital/DVI), ensuring sharp, clear visuals for all connected systems. With multi-format video support, including DVI-I (DVI & VGA), HDMI, and DisplayPort, users can connect a wide variety of computers with ease, all over standard CAT5e/6/6a cabling.

The single or dual-user functionality allows control of up to 8, 16, or 32 servers, with intuitive access methods such as USB keyboard hotkeys and the On-Screen Display (OSD) menu. The front panel LEDs provide at-a-glance server status, while each server can be labelled for quick identification and selection. Password security ensures only authorized users can access sensitive computers, providing data protection for enterprise environments.

Designed for flexibility, the switch allows server connections to be extended up to 45 meters (148 feet) from the KVM switch to the computer access dongle, ensuring robust performance even in large setups. Additionally, the system supports audio output through a 3.5mm stereo jack, enhancing the multimedia experience. The 19" rack-mountable unit features a robust metal enclosure, and its firmware upgradeability ensures it remains adaptable as your needs evolve. Whether you are managing a small setup or scaling to large server environments, the KVM Switch Series is the perfect solution for seamless, secure, and efficient server management.

About the RKS-FHDI-CX216 Model

The **RKS-FHDI-CX216** model is ideal for small setup and SME. This model allows dual-user operation over up to 16 servers/computers.
