

1080P Dual Head HDMI KVM Extender over CATx with Audio, IR, RS-232, USB 2.0 Extension, 90m

Model: KXF-HDT2-DH90

PRODUCT OVERVIEW

The **KXF-HDT2-DH90** is a Dual HDMI KVM Extender over CATx, featuring support for IR, Serial, USB, and 3.5mm analog stereo audio for both speakers and microphones, along with SPDIF digital audio. It transmits two uncompressed 1080p HDMI video signals up to 90 meters over a single CATx cable. The KVM

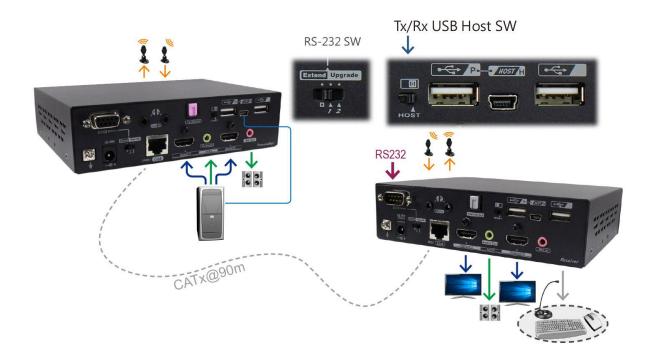

extender supports Auto/Copy EDID management and complies with HDR and HDCP standards.

The unique bidirectional audio extension function of the KVM Extender enables independent two-way audio transmission between the Transmitter (TX) and Receiver (RX) units. For optical digital audio transmission, the Extender is equipped with a Toslink optical fiber connector, allowing digital audio signals to be transmitted from the Transmitter input to the Receiver output. This optical extension technology eliminates electrical and magnetic interference, ensuring high-quality audio transmission. The Toslink connector supports most studio audio equipment, including video game consoles, Blu-ray disc players, and AV receivers.

The bidirectional IR extension feature supports full-frequency IR signals ranging from 38KHz to 56KHz. Additionally, the full-duplex data communication between the TX and RX units via CATx cable provides a cost-effective, hardware-based solution for remotely accessing and controlling RS-232 protocol devices without requiring any setup or configuration.

Each unit (TX/RX) includes four USB 2.0 ports, two on the front and two on the rear, making it suitable for both long-term and temporary USB peripheral connections. The USB OTG function allows the TX and RX units to switch roles between host and device dynamically.

KEY FEATURES

- Enables reliable remote access to a dual-monitor computer via a CATx cable up to 90 meters (295 feet)
- Dual-monitor design enhances user work efficiency
- Dual Head HDMI video supports popular resolutions up to Dual 1080P
- HDBaseT 2.0 uncompressed video extension ensures crystal-clear image quality with low latency
- Bidirectional stereo audio extension and Toslink (SPDIF) extension facilitate seamless integration with speakers and microphone, and AV receivers / audio amplifiers.
- USB 2.0 extension supports keyboards, mice, USB storage, USB cameras, and other USB devices
- USB host selection allows the USB host to be connected to either the Transmitter or Receiver
- Bidirectional IR extension enables remote control of source devices or TVs
- Serial extension supports extensive control applications
